

Figure 1 is a schematic representation of the 12 experiments. It consists of a vertical timeline with 12 experiments, each labeled with a number (1 to 12) and a duration in minutes. The experiments are arranged in a column, with the duration of each experiment indicated to the right of the label. The schematics show the sequence of events, including the start of the experiment, the duration of the experiment, and the time points for data collection. The experiments are as follows:

- Experiment 1: 10 min, schematic shows a single event.
- Experiment 2: 10 min, schematic shows a single event.
- Experiment 3: 10 min, schematic shows a single event.
- Experiment 4: 10 min, schematic shows a single event.
- Experiment 5: 10 min, schematic shows a single event.
- Experiment 6: 10 min, schematic shows a single event.
- Experiment 7: 10 min, schematic shows a single event.
- Experiment 8: 10 min, schematic shows a single event.
- Experiment 9: 10 min, schematic shows a single event.
- Experiment 10: 10 min, schematic shows a single event.
- Experiment 11: 10 min, schematic shows a single event.
- Experiment 12: 10 min, schematic shows a single event.
